

Estratégias de cálculo

- Como adicionar compensando?

$$34 + 18 = ?$$

$$34 + 20 = 54$$

$$54 - 2 = 52$$

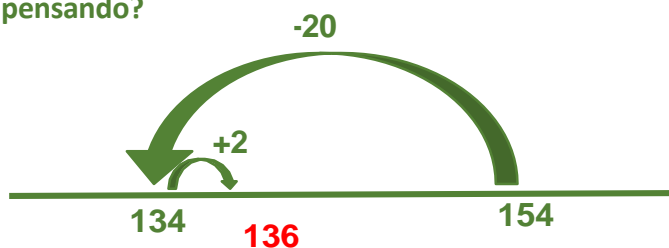

- Como subtrair compensando?

$$154 - 18 = ?$$

$$154 - 20 = 134$$

$$134 + 2 = 136$$

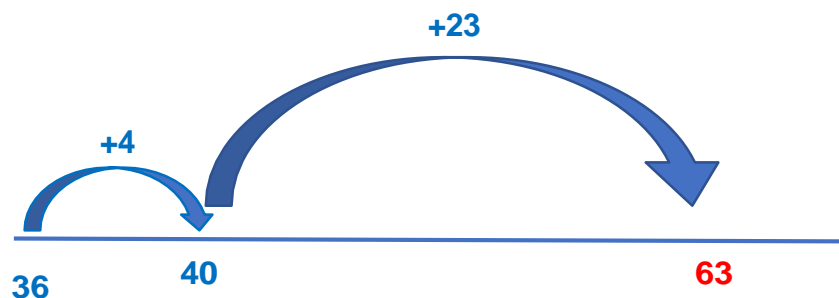

- Como adicionar decompondo a segunda parcela?

$$36 + 27 = ?$$

$$36 + 4 = 40$$

$$40 + 23 = 63$$

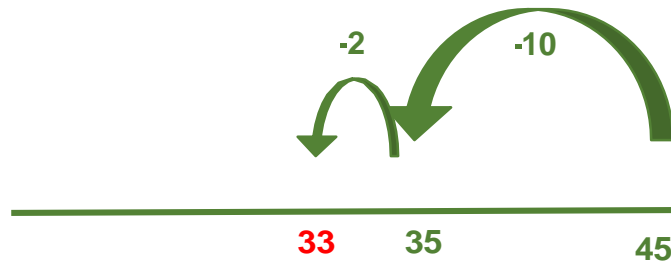

- Como subtrair decompondo o subtrativo?

$$45 - 12 = ?$$

$$45 - 10 - 2 =$$

$$45 - 12 = 33$$

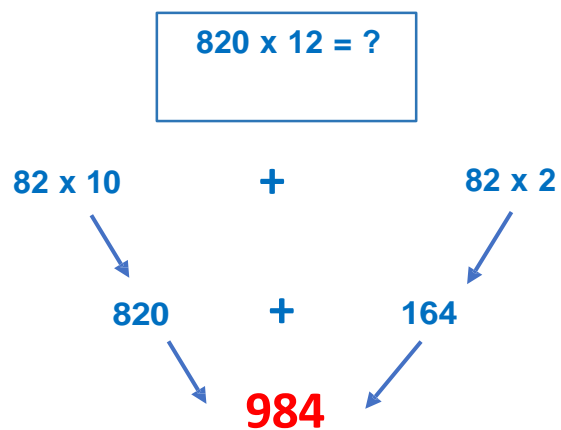

- Como recorrer à propriedade distributiva da multiplicação?

$$82 \times 12 = ?$$

$$82 \times 10 = 820$$

$$82 \times 2 = 164$$

$$820 + 164 = 984$$

- Como dividir decompondo o dividendo?

$$135 : 5 = ?$$

$$100 : 5 = 20$$

$$35 : 5 = 7$$

$$135 : 5 = 27$$
